BASIC ELECTRICAL ENGINEERING TRAINING COURSE: SINGLE PHASE WIRING

The **Electrical** sector can be defined as dealing with electrically powered machine or vehicles. It is also related to, producing products or those operated by electricity. Electrical products are categorised into three sub-sectors, namely industrial equipment, electrical components and household appliances.

Single Phase Wiring covers the scope of competency in carrying out wiring activities for single phase based on drawing given and utilizes wiring tools, equipment and materials in compliance with Electrical Act 1990, Electrical Regulations Body and Statutory requirements.

REGISTRATION FORM

Two-Day Course on Basic Single Phase Wiring

Part 1 Company Information

Name of Company :

Address :

Telephone :

Fax:

Email:

Part 2 Contact Information

Contact Person Name :

Designation :

Telephone :

Fax:

Email:

Part 3 Participant Information

Training Date (please specify) :

No	Participant Name	Designation	Remark

Note: Please indicate in the remark section if you prefer the course on weekdays.

Part 4 Terms and Conditions

- 1) MM Matrix Integrity Sdn Bhd will notify the exact date of training one (1) week earlier
- 2) If the registered participant is not able to attend, he/she may request for a replacement (3 days before the training date).
- 3) Please make a full payment prior to training to MM Matrix Integrity (M) Sdn Bhd (CIMB account no: 8600 458 106) and submit the payment details together with the registration form.
- 4) In the event of any cancellation after the payment, only 80% of the payment is refunded.
- 5) MM Matrix Integrity (M) Sdn Bhd reserves the right to postpone the course if due to unforeseen circumstance.

WE NOW OPEN FOR NEW IN-TAKE

COURSE CONDUCTED – WEEKDAYS OR WEEKEND, DEPEND ON YOUR PREFERENCES
 (UPON REQUEST) – STARTING FROM 1 JULY 2018 ONWARD

FFF : RM1000.00/PAX (SPECIAL PRICES FOR STUDENT

Open to Technical Workers, students and etc

SYNOPSIS

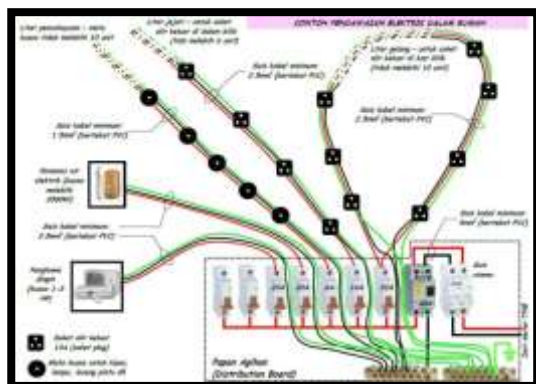

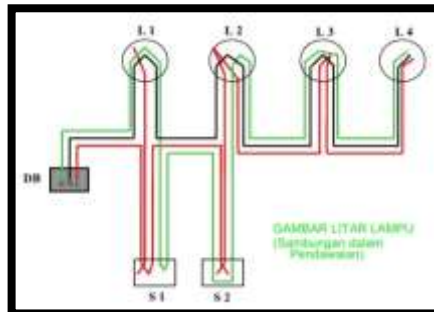

Basic Wiring Knowledge – The personnel who are competent in the Single Phase electrical wiring must be able to interpret single phase specifications and procedures, earthing system installation and carry out continuity, polarity, insulation and resistance testing on the single phase wiring system.

PROGRAM OUTCOMES

- Acquire the basic skills of single phase wiring
- Develop the electrical basic knowledge and skills toward industrial standards
- Work as an effective and independent team

WHAT YOU LEARN

- Single Phase Wiring
- Single Phase distribution board installation
- Single Phase earthing system installation

THE FUN PART

If assembling and testing out tools, materials and equipment are interesting to you then electrical engineering would be an adventure for you to explore into it. Electric components are invented and reinvented during the course, so there is no room for boredom as you will get an opportunity to try out new stuff at any time. The most exciting part is when you have finally put all the pieces together and builds something new.

SPECIAL FEATURES

- **Meals are provided** : Breakfast, lunch & light meals during the short break
- Accommodations can be arranged for those who travel from long distance
- Classes can be arranged either on weekday / weekend depend on your preference.
- **Training Certificate** is provided
- Opportunity to proceed the next level (Three Phase Installation)

COURSE SCHEDULE

TIME	DAY 1	DAY 2
0830 - 0900	Registration & Breakfast	Breakfast
0900 - 0915	Safety Briefing	Single Phase Wiring (Practical Session)
0915 - 1000	Introduction of Electrical System	
1000 - 1015	Tea Break	Tea Break
1015 - 1230	Introduction of Single Phase Wiring	Practical Session
1230 - 1400	Lunch	Lunch
1400 - 1530	Theory Session	Practical Session
1530 - 1545	Break	Break
1545 - 1700	Theory Session	Practical Session
1700	Dismiss	Certificate Ceremony & Dismiss
