TWO-DAY BASIC WELDING TRAINING COURSE: SHIELDED METAL ARC WELDING (SMAW) AND GAS TUNGSTEN ARC WELDING (GTAW)

REGISTRATION FORM

Two-Day Course on Basic SMAW and GTAW Welding

Part 1 Company Information

Name of Company :

Address :

Telephone :

Fax:

Email:

Part 2 Contact Information

Contact Person Name :

Designation :

Telephone :

Fax:

Email:

Part 3 Participant Information

Training Date (please specify) :

No	Participant Name	Designation	Remark

Note: Please indicate in the remark section if you prefer the course on weekdays.

Part 4 Terms and Conditions

- 1) MM Matrix Integrity Sdn Bhd will notify the exact date of training one (1) week earlier
- 2) If the registered participant is not able to attend, he/she may request for a replacement (3 days before the training date).
- 3) Please make a full payment prior to training to MM Matrix Integrity (M) Sdn Bhd (CIMB account no: 8600 458 106) and submit the payment details together with the registration form.
- 4) In the event of any cancellation after the payment, only 80% of the payment is refunded.
- 5) MM Matrix Integrity (M) Sdn Bhd reserves the right to postpone the course if due to unforeseen circumstance.

SMAW & GTAW Short Course

This short course introduces some basics of arc welding to beginner-level welders. It is designed to teach the basics of welding process, safety, skills and etc required to produce good welds. If you're looking for a class where you can develop your skills and increase your basic knowledge in SMAW and GTAW - Then, this course is for you!

Basic Welding Knowledge - Introduction to welding, welding processes, types of welding joint and position, welding techniques, destructive and non-destructive testing, and also career opportunity related to welding.

SMAW Workshop - Introduces welding polarity, equipment and techniques for SMAW welding. Learn how to select the correct welding rod for your project.

GTAW Workshop --Introduces welding polarity and the GTAW process. Learn GTAW welding techniques for steel and stainless materials.

OPEN to ALL - Technical workers, students etc.

WE NOW OPEN FOR NEW IN-TAKE.
COURSE CONDUCTED - WEEKDAYS OR WEEKEND; DEPEND ON YOUR PREFERENCES (UPON REQUEST) -STARTING FROM 30 SEPTEMBER 2017 ONWARD
FEE: RM 1,200/pax
(Special price for students)

Synopsis

Welding is a career choice that does not require a college degree. Welding can be a rewarding occupation for the right person and still a good career choice till to date. Hence, UWEC which is one of the internationally approved WeldcraftPro Underwater training centers is now not only offering underwater welding but also dry welding short course (i.e. SMAW and GTAW)

Program outcomes

Upon successful completion of the Basic Welding Certification, the participants will be able to;

- Acquire the basic skills of welding all the ferrous and non-ferrous metal confidently (e.g. flat, horizontal, vertical, and overhead positions) using the basic welding processes SMAW, GMAW, and GTAW.
- Develop skills toward industrial standards.
- Develop skills toward international welding certifications.
- Work as an effective and independent team member.
- Demonstrate safe work habits that reflect concern and care for self, others and environment.
- Improve welding skills and reduce defects in welding.

What you learn

You will learn about types of welding, equipment and common techniques from a professional welding trainer. These include welding safety, equipment, gear, filler metals and other essentials for you to start welding. More importantly, you will develop welding skills through practical hands-on projects.

The fun part

There's nothing like seeing the weld puddle as you look through welding hood and shaded lens for the first time. It takes a little time to get used to it, but after everything comes into focus, you will be amazed at how cool the welding really is. Our instructor is competent and certified with Vocational Training Officer (VTO) certificate and also having extensive knowledge in welding. The biggest challenge you will face is you cannot stop even after the program is already over.

Special Features:

- Meals are provided: Breakfast, lunch and light meals during the short break.
- Accommodations can be arranged for those who travel from distance.
- Classes can be arranged either on weekdays or weekends depend on your preference.
- Certificate.
- Opportunity to proceed to next level (i.e. Introduction to Wet Welding and WeldcraftPro courses)

COURSE SCHEDULE

Time	DAY 1
0830-0900	Registration & breakfast
0900-0915	Safety briefing
0915-1000	Introduction to SMAW welding process
1000-1015	Tea break
1015-1230	Continue
1230-1400	Lunch
1400-1530	SMAW practical session
1530-1545	Break
1545-1700	Continue practical session
1700	Dismiss

Time	DAY 2
0830-0900	Breakfast
0900-1000	Introduction to GTAW welding process
1000-1015	Tea break
1015-1230	Continue
1230-1400	Lunch
1400-1530	GTAW practical session
1530-1545	Break
1545-1700	Continue practical session
1700	Certificate ceremony and dismiss
