Introduction to Underwater (Wet) Welding Program

Introduction to wet welding short course is designed to give the exposure to those who have keen interest in becoming the wet welder in the future. This course also provides an insight into wet welding field to students from universities and other institutions. Therefore, they will be led by the qualified instructor to the correct path to become commercial divers and wet welders later on.

KEY OBJECTIVES

- To give exposure to students in wet welding.
- To provide some basic knowledge of underwater welding and diving.
- To provide some understanding and awareness of using correct wet welding technique, consumables and equipment.

COURSE OUTCOMES

- The student will obtain the basic knowledge in diving and wet welding.
- The student shall have some basic skills and hands-on practical underwater welding.

WHO CAN ENROL?

- Open to anybody who is interested in wet welding. For example, students, engineers, welders, divers etc.
- This course is 100% HRDF claimable.
- Must enrol a confined scuba course.
