

Underwater Welding Technology Training for Professional Divers

An intensive two-week, closely supervised course, providing both theoretical and practical hands-on experience for both wet and dry welding. The course consists of a series of lectures together with written and practical assignments and ultimately culminates in an end of course (closed book) examination and fillet welder qualification test. The practical exercises concentrate on developing the basic techniques necessary to produce sound welds both above waterline and below the waterline. This will be achieved through a few times of well planned and proven training exercises.

EMTA Awards Limited
Part of the SEMTA Group

What make our course so special!

- ▶ Less than 2 week course!
- ▶ Very affordable price for any kind of verified achievement underwater welding course.
- ▶ Internationally recognized course (by ABS, IMAREST, Zurich Surveyor, EAL).
- ▶ UWEC is the only approved wet welding school in Asia.
- ▶ Very friendly, helpful, integrated and competent Instructors.
- ▶ Dual Language; English & Malay (Easy to understand and learn).

What you will learn

- ▶ Safe underwater welding.
- ▶ Introduction to SMAW plant & equipment.
- ▶ Underwater welding techniques.
- ▶ Electrode & weld terminology.
- ▶ Basic weldability & common weld defects.
- ▶ Monitor & record welding operations.
- ▶ Quality assurance & quality control.

What do you need

- ▶ Certified Commercial Diving License
- ▶ 18 years old and above
- ▶ Medically fit to dive
- ▶ No welding experience needed

Who should attend

- ▶ All certified commercial and professional divers working in the marine, shipping, and construction industries, with or without previous welding experience.

**WeldcraftPro Underwater Welding
Technology Training
2 weeks**

USD 7,500.00

PER STUDENT (ISO 15618 + AWS D3.6)

Includes

- Lodging / meals/ Approved teaching materials.
- Diving suits and other facilities.
- Consumables (Barracuda electrodes, welding plates and etc).
- Examinations (visual examination, fracture test and macro test).
- International Certificates.
